FOREWORD

These tables represent the detailed tabulations published in the HCFA (NCSS) Reports B-4 Numbers of Recipients and Amounts of Payments Under Medicaid, and the B-4 (Supplement); Medicaid Recipient Characteristics and Units of Selected Medical Services. The data were derived from Form HCFA-2082, Statistical Report on Medical Care: Recipients, Payments, Services. State agencies administering approved Title XIX programs are responsible for completing report forms and submitting them to the Office of Policy, Planning and Research, Health Care Financing Administration.

Previous reports in the B-4 series were published by the National Center for Social Statistics of the Social and Rehabilitation Service for calendar years 1968-70 and fiscal years 1972-74.

DEFINITIONS AND INTERPRETATIONS

Medicaid (Title XIX of the Social Security Act) is an assistance program designed to provide medical assistance to specified groups of needy individuals. Such persons are classified into two main groups according to their maintenance assistance status, (1) those who are authorized to receive money payments for their basic necessities under public assistance programs such as Aid to Families with Dependent Children, and (2) those who are not receiving maintenance assistance payments even though some may, in fact, be eligible. There are four basic eligibility requirements for medical assistance: (1) age 65 and over; (2) blindness; (3) permanent and total disability; and (4) membership in families with dependent children. In addition, some States have exercised the option of including other needy persons who do not fall into any of the above categories. Such recipients are classified as 'Other title XIX' recipients in the accompanying tables. Also, 'essential persons' (usually spouses) may also be eligible for medical care. For money payment recipients, these persons are usually classified according to the same eligibility factors as the recipient spouse.

In tables showing numbers of recipients, a total represents the unduplicated number of persons for whom vendor payments were made for one or more types of care during the year.

Amounts of payments do not include premiums paid for supplementary medical insurance under the Medicare program.

Age groupings on tables showing demographic characteristics of recipients do not necessarily agree with the eligibility criteria based on age. For example, a mother in an AFDC family is considered an adult regardless of age. Similarly, the spouse of a recipient who is 65 years of age or older may receive medical services on the basis of the qualifying spouse's eligibility criterion even though under age 65. Blind and disabled recipients may be any age.

Abbreviated definitions of the types of services for which data are reported are:

Inpatient hospital services - All items of care furnished to an inpatient and covered by the hospital's bill.

> General hospital - A hospital maintained primarily for inpatient care of acute illness or injury and for obstetrics or tuberculosis.
>
> Mental hospital - A hospital primarily engaged in providing psychiatric services for the diagnosis and treatment of mentally ill persons.

Skilled nursing home services - All services furnished to inpatients of, and billed for by, a licensed or formally approved nursing home that meets standards required under a title XIX program.

Intermediate care facility services - All services provided by an institution furnishing health-related care and services to individuals who do not require the degree of care provided by hospitals or skilled nursing homes.

Physicians' services - Services provided by an individual licensed under State law to practice medicine or osteopathy. Services covered by hospital bills are not included.

Dental services - Services, including ancillary services, provided by a dentist in the practice of his profession.

Other practitioners' services - Services of licensed practitioners other than physicians and dentists.

Outpatient hospital services - Services furnished to outpatients by a hospital.

Clinic services - Services furnished to outpatients by a facility which is not part of a hospital, but which is organized and operated to provide services to outpatients.

Laboratory and radiological services - Professional and technical laboratory and radiological services provided in an office or similar facility (other than a hospital outpatient department or clinic) or by a qualified laboratory.

Home health services - Services furnished a patient in his home, including: intermittent or part-time nursing service provided by a home health agency, or by a registered professional nurse or licensed practical nurse; medical supplies, equipment, and appliances for use in the home; and services of a home health aide.

Prescribed drugs - Drugs dispensed by a licensed pharmacist on the prescription of a practitioner licensed by law to administer such drugs, and drugs dispensed by a licensed practitioner to his own patients. This item does not include a practitioner's drug charges that are not separable from his other charges, or drugs covered by a hospital's bill.

Family planning services - Any medically approved means, including diagnosis, treatment, drugs, supplies, and devices, and related counseling which are furnished or prescribed by or under the supervision of a physician for individuals of child-bearing age for purposes of enabling such individual freely to determine the number and spacing of their children.

Other care - Any medical or remedial care not covered by the above included in the State plan and recognized under State law.

ANNOTATIONS AND LIMITATIONS OF THE DATA

1. Arizona has no Title XIX program and does not appear in this report.

2. Colorado, Connecticut, Guam, New York, Rhode Island, Washington and Wyoming did not submit reports for fiscal year 1976. For all missing States except Guam, total recipient estimates are included in the tabulations and payment data by basis of eligibility of recipient and type of service were derived from monthly data collected on report Form HCFA-120. Payment data collected on the monthly reports are additive over the twelve month period. In contrast, recipient counts are not cumulative because the annual report provides for an unduplicated count and recipients can be counted several times during the year on a monthly basis. Hence, recipient estimates were developed by 'aging' data contained in previously submitted annual reports based on changes in the average monthly numbers of recipients between the two annual time periods.

3. North Carolina's data are for the eleven month period: August 1975 through June 30, 1976, i.e. all data for July 1975 are excluded. Data for clinic services and prescribed drugs are even less complete with State/Local funds excluded from clinic payment amounts and data through November, 1975 excluded for prescribed drugs. Recipient and payment data for intermediate care facilities for the mentally retarded is based on four months data for Kentucky.

4. Pennsylvania's recipient counts cannot be validated. The State samples at a theoretical five percent rate but the actual weight applied to the sample data reflects a much lower rate which is based on claims. The adjusted inflation factor results in accurate money amounts, but not necessarily accurate recipient counts.

5. Massachusetts supplied recipient counts for each type of service and a total unduplicated number. The detailed eligibility categories were developed by applying the median of the ratios of the annual to the average monthly numbers for reporting States to the monthly counts submitted by the State for the aged, blind and disabled categories. Members of families with dependent children were derived by subtracting the estimates for the above categories from the submitted total. Maintenance assistance status categories were developed by ratios for various services.

6. Indiana submitted two half year's reports because their systems conversion made the data from the two periods incompatible. Using the higher of the two half years as a lower bound and the sum as an upper bound, recipient counts were developed from the average payment amounts for the fiscal years 1975 and 1977.

7. The theoretical five percent sample of recipients for California was determined to represent six percent of the claims by the State. Further investigation by the State revealed that the positioning of the case numbers (case number endings are used for the sample) differed between Title XVI (adult categories) recipients and recipients whose case numbers were assigned by the State. Federal staff confirmed the sample bias by comparing cumulative monthly expenditures by basis of eligibility with the sample data.

The sample was poststratified using inflation factors of 6 percent for the age 65 and over and the blind, 7 percent for the disabled and 5 percent for other categorie

8. Payment data differ somewhat from the preliminary report B-5. Validation efforts by the Office of Policy, Planning and Research include comparing the previously published data which was cumulated from monthly reports submitted on Form HCFA-120 with data based on the annual submittals. Exact agreement between the two sets of reports is not expected because retroactive cost adjustments and cost settlements are included on the monthly reports and not the annual, payments made by health maintenance organizations are required on the annual report but not on the monthly. and sampling is allowed for the annual report but discouraged for monthly data. Eleven States showed variances in excess of five percent between the cumulated monthly reports and the annual. They were Alaska, Illinois, Louisiana, Maine, Massachusetts, New Hampshire, North Carolina, (See Note 3); North Dakota, Utah, the Virgin Islands and Wisconsin.

9. Some States have previously indicated that with the use of computers, it is basically as simple for them to prepare complete reports Form HCFA-2082 rather than to use sampling for the report. However, the Office of Policy, Planning and Research recommends and encourages the use of sampling when it simplifies report preparation. The sample frame is the universe of recipients for whom payments for medical services are made during the year. Case number endings usually serve as the basis for selecting a systematic random sample. States using sampling for the 1976 reports were California (theoretical 5%; see note 7), Illinois (10%), Pennsylvania (theoretical 5%; see note 4), Puerto Rico (1%), and Texas (1%, with universe counts for mental hospitals, skilled nursing facilities, intermediate care facilities for the mentally retarded, family planning and home health services).

10. Every State Medicaid program must cover inpatient hospital services, outpatient hospital services, other laboratory and radiological services, skilled nursing facility services and home health services for individuals 21 and older, early and periodic screening, diagnosis and treatment services for individuals under 21, family planning and physicians' services. Data on screening services are not included in the tables. Except for Puerto Rico and the Virgin Islands which do not provide skilled nursing services, some States have grouped together two or more services under another class, most notably in the case of family planning services, which in several instances, is distributed among provider types e.g., prescribed drugs and physicians' services. There are other instances where such groupings have occurred for optional services.

11. Payments and estimated recipient counts for nonreporting States are included in Tables 1-5, 8-9, 19-20, and 37-40 only.

12. Small differences may appear in National totals as well as State totals due to rounding of dollar amounts.

13. Among the tables on demographic characteristics, racial data were the most underreported items. In addition to the States cited in note 2; California, Massachusetts, Puerto Rico, West Virginia, and Wisconsin did not provide racial data. California excluded demographic and utilization data for HMO recipients, also.

14. Most of the Medicaid recipients 65 years of age and older and many blind and disabled recipients are also covered by Medicare (Title XVIII). In fiscal year 1976 States with buy-in agreements with the Medicare program paid Supplementary Medical Insurance premiums totalling $251 million on behalf of their indigent aged and disabled recipients. In cases where benefits are exhausted or required services are not covered under Medicare, the Medicaid program makes payment. Medicaid also pays the deductible costs under Medicare as well as coinsurance payments for persons covered under both programs. For purposes of reporting, States are instructed to exclude general hospital discharge data and days of care for which Medicaid paid only the deductible amounts.

15. There are further State exclusions (in addition to the States in note 2) of detailed data on units of service:

    A. General hospital services: Maine, West Virginia 1/ and Wisconsin

    B. Skilled nursing home services: Indiana 1/, Maine, West Virginia 1/, Wisconsin, Puerto Rico 2/, Virgin Islands 2/

    C. Intermediate care facility services: Indiana 1/, Maine, West Virginia 1/, Puerto Rico 2/, Virgin Islands 2/

    D. Physicians' services: Indiana 1/, Maine, West Virginia 1/

    E. Prescribed drugs: Alaska 2/, Maine, Indiana 1/ and West Virginia 1/
